- Отладка приложений

Tuple module

```
-module(active_record).  
-export([some_fun/2]).
```

```
some_fun(FirstArg, SecondArg) ->  
    io:format("FirstArg:~p, SecondArg:~p~n", [FirstArg,  
SecondArg]).
```

В консоле:

```
1> R = {active_record, blablabla}.  
2> R:some_fun(first).
```

Веб сервера

- yaws (<https://github.com/klacke/yaws>)
- mochiweb (<https://github.com/mochi/mochiweb>)
- webmachine (<https://github.com/Webmachine/webmachine>)
